# Team Agreement Document

## 1. Team name and designated team leader

**Team name:** TrafiK

**Team leader:** Augustinas Pletkus

### How the team elected its leader, and why

Augustinas volunteered to be the leader of the project.

### Responsibilities and authority of the team lead

- Supervision of team members.
- Assigning tasks to the team members.
- Keep track of deadlines.
- Organise and lead team meetings.

## 2. Team ambition — common desired grade

Good (7–8).

## 3. Key team rules

- Respond to messages within 24 hours.
- Notify the team as early as possible if you cannot meet a deadline.
- All code is reviewed by at least one other member before merging.

## 4. Key principles governing work distribution

Tasks will be assigned by accounting to the team members strengths and interests.

## 5. Capacity constraints

### Individual availability

Edvinas Ryliškis - after work hours.
Audrius Duoblys - after lectures.
Augustinas Pletkus - after lectures.

### Team meeting constraints

Team meetings will be happening after work hours (after 5 P.M) and after lectures.

## 6. Team meeting times and group work

Weekly meeting every monday at 8 P.M and if needed planned meetings throughout the week.

## 7. How the team will track progress

Notion board, marking sprints, user stories and tasks.

## 8. Sanctions and punishment within the team for breaking agreements

Missed deadlines, no-shows, or unmet commitments will result in more work load.

## 9. Use of AI tools and assistance in lab work

The team will not use AI code generation in its lab work. AI can be used for consultation, research and text generation, but generative AI won't be used to create code.

---

Agreed and signed by all team members:
Audrius Duoblys
Edvinas Ryliškis
Augustinas Pletkus
